Hello, I'm Rachel Wener

I'm a self-employed designer, UI/UX specialist, and front-end developer based in Philadelphia, USA. I started my career over 10 years ago in college, helping friends and classmates build websites and brands for their projects. Since then I've worked for design agencies, helped startups build and market their products, and collaborated with many talented individuals on marketing, web and UI projects.

Experience

2019 - Present

UI/UX Designer & Developer - ERPHealth

Design the user interface and build the front end for a HIPPA compliant behavioral health platform that consists of multiple web apps and interfaces. Wireframes, mockups, and assets are created in Adobe Photoshop, Illustrator, and InDesign. Front-end of web application is built with HTML, CSS, and JS.

2019 - Present

Designer & Wordpress Developer - Philly Friendship Circle

Design and build all things marketing for Philly Friendship Circle, including a custom Wordpress site, annual reports, newsletters, mailers, email and social media campaigns, branded packaging and more.

2019 - Present

Designer & Wordpress Developer - FTC Solar

Manage and build upon pre-existing Wordpress site, create digital and print ad campaigns, design trade show booths & presentations, create reports & white papers.

2020 - 2022

Designer, UI/UX Designer, Wordpress Developer - Curative Sciences

Developed brand styles and guide based on provided logo, designed the user flow and interface for a native web app which controls medical devices, built wordpress site with tight timeline using customized premium Wordpress theme & Elementor, designed packaging for medical device and other medical products.
